Narrative Description

All West Communications planned for a number of specific improvement projects for 2015, including new line extensions and equipment installations, cable and other equipment additions and upgrades, and maintenance of existing facilities. These projects will significantly improve voice service coverage, broadband access and speeds, and the overall capacity of the network.

Specific capital improvement projects, along with USF received, are set out in **Attachment 1**, 5-year Service Quality Improvement Plan. All West Communications is currently completing several FTTP projects that will bring more reliable and increased bandwidth capabilities to a greater number of our current and future subscribers. We are also upgrading our backbone and middle mile facilities in order to accommodate this increased demand for bandwidth. We are continuing to migrate to an all IP network with additional investment in general support facilities and equipment along with transmission, cable, and supporting facilities. This planned FTTP build is scheduled to be complete at the end of 2015. All West Communications' planned capital expenditures for 2016-2019 are an estimate of the amount required to maintain our current FTTP build and meet carrier of last resort obligations. Any additional cash flow generated from operations will be used to service the debt incurred with the FTTP build.

As set out in **Attachment 1**, the Company estimates that its total capital expenditures in 2015 within the State of Wyoming will be approximately \$160,000. The Company estimates that its service quality improvements planned for 2015 will serve a population of approximately 706 and cover an area of approximately 331 square miles. As of May 31, 2015, All West Communications has spent \$96,000 of the \$160,000 and completed approximately 60% of the planned projects. The map included in **Attachment 1** details out the locations of the currently completed projects.

Attachment 1 also sets out the projected capital expenditures, population and area served for the years 2016-2019. The projected expenses, along with the projects listed within this update, are used to improve service coverage and service capacity. The USF received year-to-date is allocated between CAPEX and OPEX and has been used in accordance with Federal rules and obligations, in the public interest to improve service quality, service coverage and service capacity.

Functionality in Emergency Situations:

Voice Network

Pursuant to 47 C.F.R. § 54.313(a)(6) and 47 C.F.R. § 54.22(b)(4) as set forth in 47 C.F.R. § 54.202(a)(2) All West Communications, Inc. ("ILEC") meets the requirements to remain functional in emergency situations and has the following capabilities: Back-up power is provided to ILEC central offices by use of a generator and batteries that provide it with 8 to 12 hours of emergency power. In addition, ILEC field electronics have 8 to 12 hours of back-up power by use of generators and batteries. ILEC also has SONET, DWDM, and MPLS technology deployed in its core fiber optic network that is a self-healing and will automatically reroute traffic should a fiber cut occur. ILEC has also sufficient spare cards for its fiber optic network to provide almost instantaneous replacement should there ever be a card failure in the core network. ILEC also has proper staff in place to repair any fiber cuts in a timely manner. ILEC has connectivity with neighboring telephone exchanges as well as the LATA tandem to provide diverse options to reroute traffic should an emergency arise. ILEC has developed and trained its staff on network preparedness plans in case of emergency situations. ILEC is prepared and capable of managing traffic spikes resulting from emergency situations and has sufficient switching capabilities to handle such situations.
